

# Featured Day Trip Activity

## Dry Falls Visitor Center

*Located within 2 hours of Canyon River Ranch is one of the natural wonders of North America. The Dry Falls Cataract is a 3.5 mile chasm of basalt with a 400 foot drop. This was left thousands of years ago by one of the last ice ages floods that came through the Grand Coulee. To see panoramic views of the Dry Falls, visit the historic Vista House Overlook. The dormant Ice Age waterfall has left behind a series of plunge pool which are now ground-fed Oases for nearby wildlife. It is said to be one of the most extraordinary landscapes to be found along the Ice Age Floods National Geologic Trail.*
